Project Executable Files

Date	1 October 2026
Team ID	6ab63662000bf9bb96385cb4
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Project Executable Files

This document lists all executable components, configuration files, and deployable artifacts of the Auto Ticket Classification system within the ServiceNow platform.

S.No	File / Component Name	Type	Location / Path	Description
1	Auto Classify Incident	Flow Designer Flow	Flow Designer > x_auto_classify.auto_classify_incident	Main orchestration flow triggered on incident creation.
2	Get PI Prediction	Flow Designer Subflow	Flow Designer > x_auto_classify.get_pi_prediction	Calls Predictive Intelligence API for classification.
3	Route to Assignment Group	Flow Designer Subflow	Flow Designer > x_auto_classify.route_to_group	Maps category to resolver group and assigns.
4	Handle Low Confidence	Flow Designer Subflow	Flow Designer > x_auto_classify.handle_low_confidence	Routes low-confidence tickets to manual queue.
5	ClassificationUtils	Script Include	System Definition > Script Includes > ClassificationUtils	Reusable utility class for classification operations.
6	AutoClassifyTrigger	Business Rule	System Definition > Business Rules > AutoClassifyTrigger	After-insert rule on Incident table triggering the flow.
7	ConfidenceScoreWidget	SP Widget	Service Portal > Widgets > confidence-score-display	Displays prediction confidence on incident form.
8	Classification Dashboard	PA Dashboard	Performance Analytics > Dashboards > Auto Classification	KPI dashboard for classification metrics.
9	Incident Classification	PI Solution/Model	Predictive Intelligence > Solutions > Incident Classification	Trained ML model for category prediction.
10	PI Retraining Job	Scheduled Job	System Definition > Scheduled Jobs > PI Weekly Retrain	Weekly scheduled retraining of the ML model.
11	x_auto_classify_log	Custom Table	System Definition > Tables > Classification Audit Log	Stores audit trail of all auto-classification actions.

12	x_auto_classify_category_mapping	Custom Table	System Definition > Tables > Category Group Mapping	Maps categories/subcategories to assignment groups.
13	Auto Classify Update Set	Update Set	System Update Sets > Auto_Classify_v1.0	Deployable package containing all components.
